

WEWALK
Smart Cane for the Visually Impaired
Powered by **YGA & VESTEL**

WeWALK *Revolutionary Smart Cane for Visually Impaired*
EDISON AWARD
2018
GOLD WINNER

WeWALK , honored with Edison Gold Award, is developed and implemented by YGA and VESTEL cooperation. Being today's most developed smart cane for the visually impaired and blind people, it offers 3 revolutionary features...

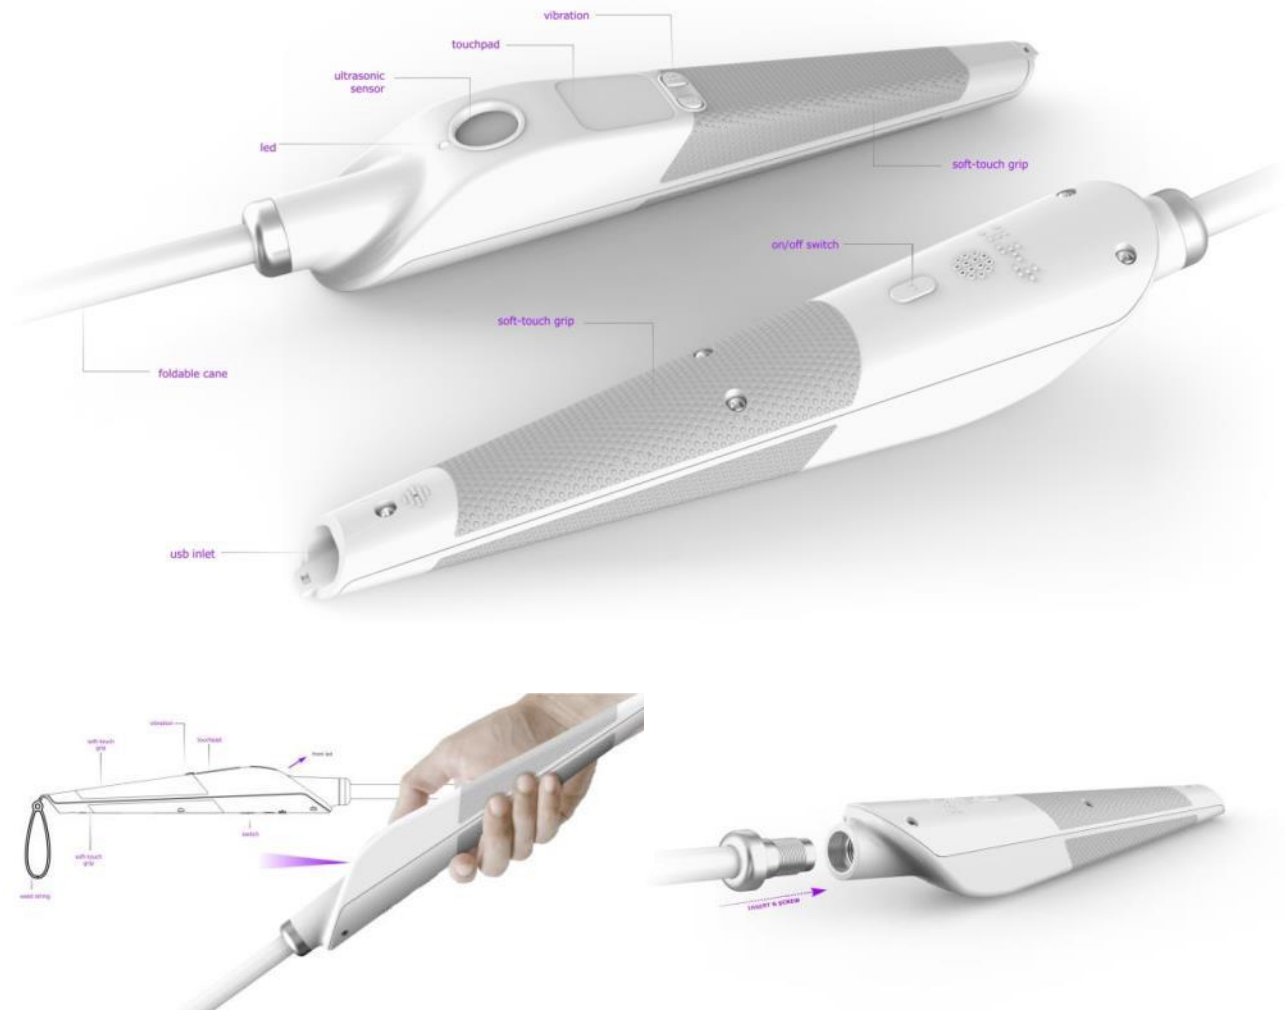

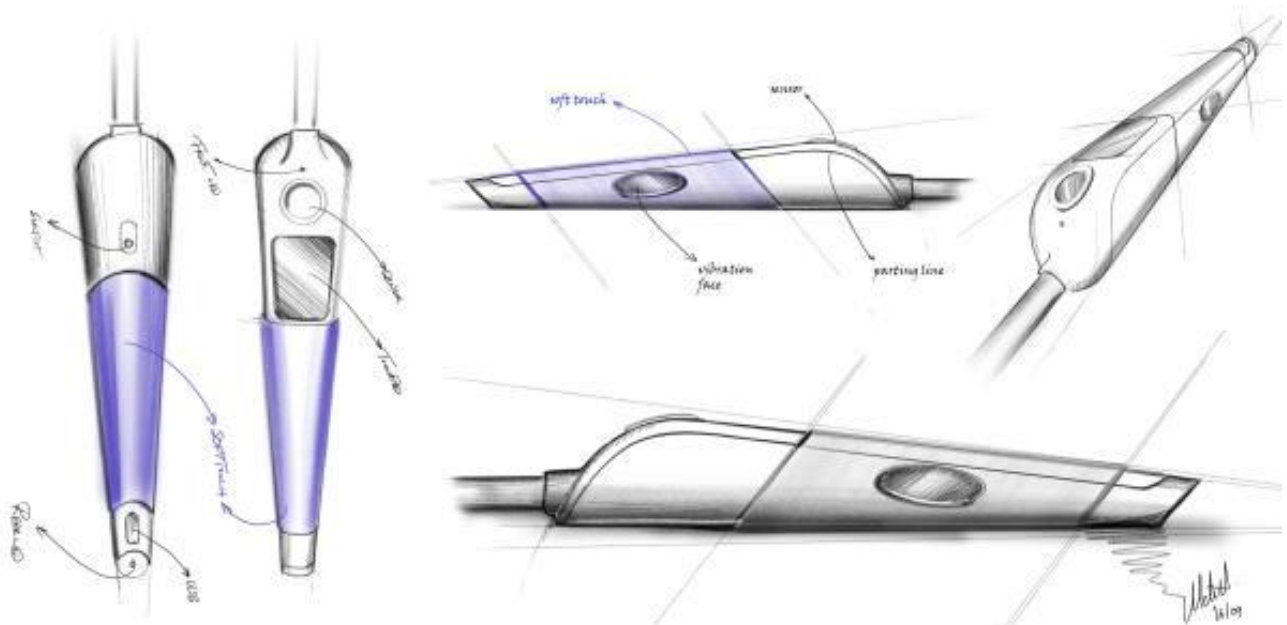

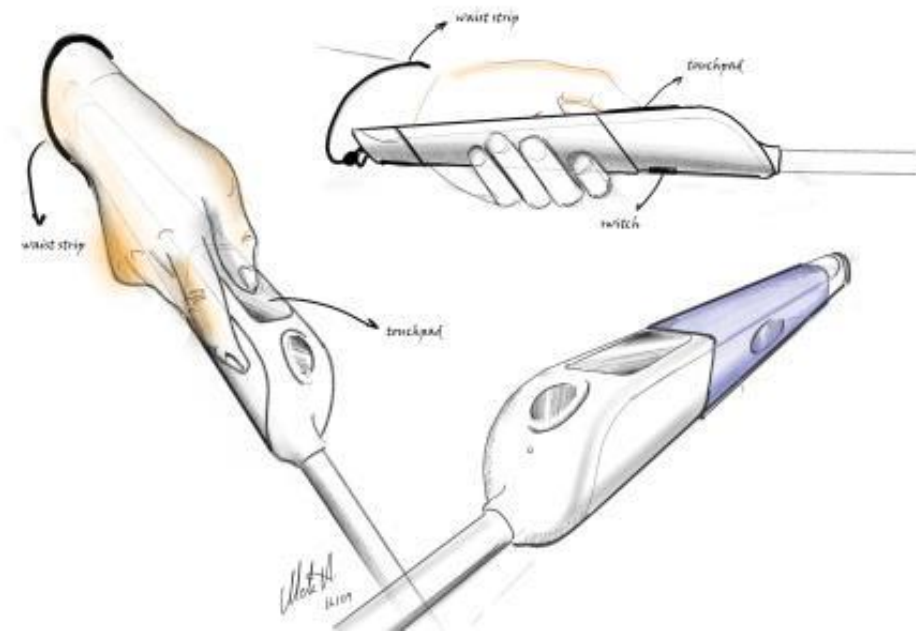

Obstacle Detection: Easily detects and warns the user of obstacles at breast and head level such as signs, poles, branches, etc. **Phone Integration:** Simulates the phone screen and enables phone control when connected via Bluetooth. **Open Platform:** Ability to integrate with all mobile applications. Thus, new features can be added each passing day.

“Today is my first day with WeWALK. For the first time in my life I went home without hitting anything and without anyone's help.”
